WEAR CHANGE

The baseline “Wear Change” reflects a bold commitment to making a real difference in the fashion industry and beyond. It’s a call to action, inviting people not only to wear clothes but to wear a mindset, a movement, and a purpose. “Wear Change” means choosing garments made from recycled materials, opting for durable practices, and choosing a future where fashion is both stylish and responsible.

DIGITAL PRODUCT PASSPORT

IQONIQ is transparent in sharing impact and social data; each garment comes with a Digital Product Passport. Integrating such cutting-edge technology allows consumers to trust that every garment is genuinely made from recycled materials, reinforcing IQONIQ's mission of accountability and environmental stewardship.

AWARE™ TRACER

IQONIQ uses the Aware™ solution, which combines a physical tracer with public blockchain technology, ensuring the authenticity of its claims and offering trusted traceability. Every product can be traced, thanks to a physical tracer that tracks its journey from the raw material to the finished product.

RECYCLED MONO MATERIALS

The use of recycled mono materials in textiles is a win-win situation. Using recycled materials limits the environmental impact compared to using virgin materials, and using mono materials provides the best recycling opportunities. True and simple!
